Hostel Energy Waste Is Invisible.

01 — NO VISIBILITY

Students don't know how much electricity their room consumes.

02 — NO INCENTIVE

Saving electricity provides little immediate motivation.

03 — NO COMPETITION

No social mechanism encouraging students to outperform others.

Traditional Hostel

Invisible Consumption

Wasted Energy

Turn Energy Saving Into a Game.

TRACK
COMPARE
COMPETE

-
-
-
-

Transforms electricity conservation from an invisible responsibility into a visible, competitive and rewarding experience.

How the Experience Works

1. ENERGY DATA

Room consumption is recorded.

2. EFFICIENCY SCORE

Daily usage is compared against the 80 kWh target.

3. LEADERBOARD

Rooms are ranked from most to least efficient.

4. ACHIEVEMENTS

Students earn streaks and badges.

5. CAMPUS PERKS

Top performers unlock meaningful rewards.

The Product

Saving Energy Has Never Been This Competitive.

Achievements

 7-Day Fire Streak

 14-Day Star

 Top 5 Crown

 Biggest Improvement

 First Day Under 80 kWh

 Zero-Waste Champion

6 efficient days → NEXT PERK

Unlock Campus Perks

 \$5 Coffee Voucher

 \$10 Laundry Credits

 Prime Parking Spot

 Gaming Room Access

 Extended Library Hours

Built Fast. Designed to Scale.

React Tailwind CSS Recharts Mock Data Layer

React + Vite

Tailwind CSS

Lucide / FontAwesome

Mock JS Data

Vercel Deployment

** Frontend-first prototype — zero backend required for the hackathon.*

From Hostel Competition to Campus Sustainability.

ENERGY

Reduced unnecessary consumption.

BEHAVIOR

Creates visible sustainable habits.

COMMUNITY

Turns conservation into a shared challenge.

Future Roadmap

PHASE 1

Frontend prototype (Current)

PHASE 2

Smart meter integration

PHASE 3

Campus-wide deployment

PHASE 4

AI-powered energy insights

PHASE 5

Multi-campus sustainability network

WHAT IF SAVING ENERGY COULD BE A COMPETITION?

HOSTEL ENERGY LEADERBOARD

Save Energy. Climb the Ranks. Earn the Rewards.

Making sustainable behavior visible, competitive and rewarding.

THANK YOU !
